

Wireless Outdoor Alarm System GENIO

Wireless Outdoor Alarm System

GENIO

Protect your house 24 hours / 7 days
Safety and Peace of mind with Wireless Outdoor Alarm System

Outdoor security which Optex believes

Home CCTV is a useful solution to record and know "What happened in the past". However, it does not give you any notifications when an intruder breaks into your house. Optex believes that having outdoor security is the most effective way to secure your safety. Imagine that you run into an intruder in your house. This is the worst situation. With outdoor security, it can notify you right after an intruder reaches your garden so that you can respond it earlier or even turn them away by the sound of outdoor siren.

GENIO is the home security solution for you

GENIO is a wireless outdoor alarm system from Optex. GENIO alarm system can watch your home for 24 hours / 7 days including outdoor premises such as garden and backyard.

This enables to realize the most important measure for home security, to prevent the dangerous situation of your family before something happens, and bring you the life of safety and peace of mind.

This is the solution Optex offers.

Arming

Detection

Activation

GENIO Alarm Monitoring System

GENIO is a wireless outdoor system which has following detectors for protection of your house and a siren for a neighbor notification.

For Perimeter Protection

Short Range Photoelectric Detector SL-100TNR / SL-200TNR

It detects an intruder who is trying to enter your premises by climbing over a fence. You can become aware of the intruder at early stage of intrusion.

1

For Window/Shutter Protection

Outdoor PIR Detector BXS-R-GEN / FTN-R-PT-GEN

It detects an intruder who is trying to break into your house through a window / shutter. You would notice the intruder before break-in.

2

For Garden / Parking Place and Balcony Protection

Outdoor PIR Detector VXI-R-GEN

It detects an intruder who entered your garden / parking place and/or is trying to break into your house through a window. You would notice the intruder before break-in.

3

For Corridors / Rooms Protection

Indoor PIR Detector RXC-RST-GEN

It detects an intruder who intruded your house.

4

For Neighbor Notification

Wireless Outdoor Siren GEN-OSR (Accessories)

A loud sound with a flash of light notify your neighborhood when emergency.

For Windows / Backdoors Protection

Wireless Magnetic Door Contact DOOR CONTACT (Accessories)

It detects an intruder who opens a window / a door. It can be utilized as a door chime activator when disarmed.

Optex Sensing Technologies

In perimeter of your property and garden, there are many factors of false/missed alarms like a sunlight, a car head light, animals, insects and a sway of plants. Even in such harsh conditions, our technologies can offer a stable detection of intrusion with brilliant optical technologies and original algorithm.

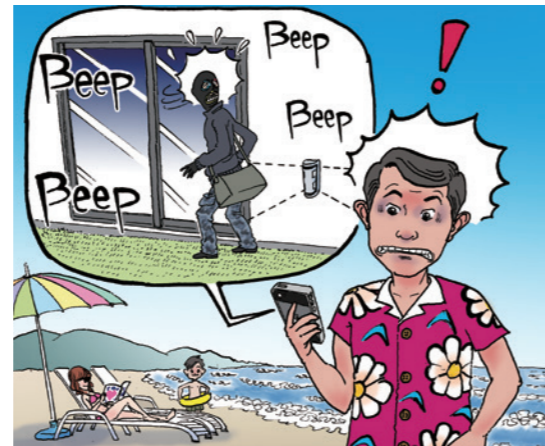

We have so many sensing technologies through long experience and we choose proper detectors for each field of installation. This contributes to develop more stable and safer detectors which can be used for various security applications.

Benefit

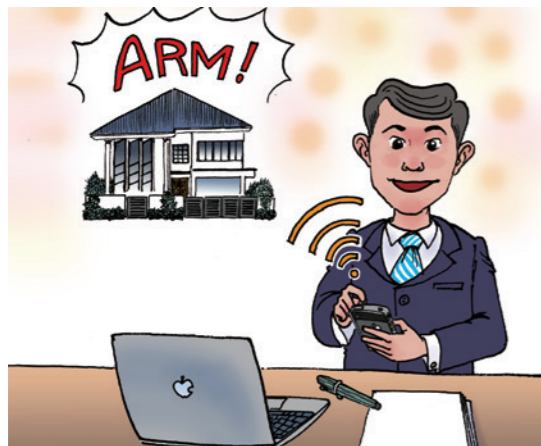

Outdoor Security

It's effective for your safety to send an intruder away from your property before break-in occurs.

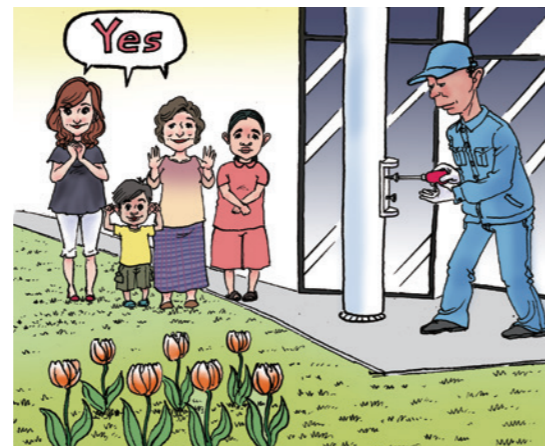

Remote Notification

GENIO lets you know an emergency even when you go out.

Remote Controlling

Arm / disarm can be set by GENIO smartphone app.

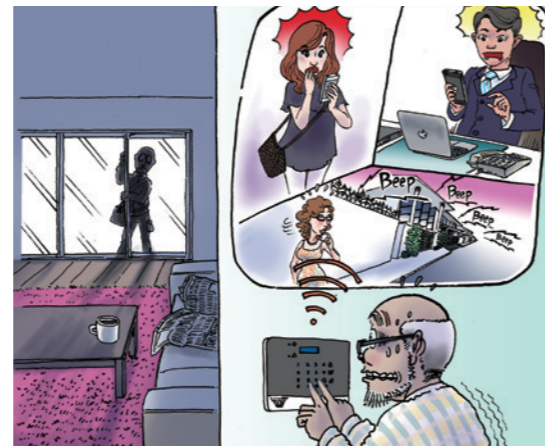

Beauty & Agility

You don't have to ruin your garden for installation.

Invisible Fence

No physical fence would be required anymore.

Emergency Notification

You can notify your family when emergency with a special PIN code.

Customer Voice

Case 1 (Da Nang, Vietnam)

My house was broken into by thief so I decided to install GENIO. Now I feel much safer because I can notice intruders instantly before entering inside of my premises.

Case 2 (Ayutthaya, Thailand)

I installed GENIO inside and outside my grandparents' house. I can receive notifications in case of emergency. They are very happy now because GENIO is easy and reliable!
